GARY P. SERDAR  
CLERK OF COURT

BY \_\_\_\_\_  
DEPUTY CLERK

June 13, 2008

On Wednesday, June 11<sup>th</sup> at 10:30 am Scott Venhaus, Karsten Sorenson and myself terminated Robert Mullins. We collected his badge to the building and his other keys. We asked Robert Mullins if he had any personal items in the building. He said that he had a binder and a flash drive. Then he corrected himself and said that he had the binder in his car so all he had inside the building was his flash drive. He asked if he could go and get it. I told him that he was not to return to his desk to collect his personal effects but that we would mail it to him. He was very concerned about his personal flash drive. He said that "his whole life" was on that drive and said "I really needed it back." I insisted that we would mail it to him. I asked him if he had any other questions. He said "No". He didn't say much after that. He gave us his smock and keys and calmly left the building. I had two Logan City policemen outside in the parking lot in case we needed their assistance.

Karsten gave the flash drive to Tom Sunderland, our IT Manager. He reviewed the contents and found a few tests and software that were used to test our ClearOne equipment. Tom removed the worked related tests and gave the flash drive to me. I locked up the flash drive in my desk.

  
Jessica Keller

## SYNOPSIS:

On June 16, 2008, Special Agent (SA) James Wright of the Office of the Assistant Special Agent in Charge (ASAC), Salt Lake City, UT received a request for computer forensic analysis and examination from the Office of the Resident Agent in Charge (RAC) Ogden, UT. The RAC/Ogden request was pursuant to the execution of a federal search warrant at INTHINC Corporation located at 1073 West 1700 North, Logan, UT 84321. Ms. Jessica Keller, Director, Human Resources, INTHINC identified Robert MULLINS, an employee, as accessing child pornography on a company computer. SA Robert Stokes seized one (1) computer and one (1) universal serial bus (usb) drive that were used to access child pornography on the Internet.

On November 21, 2008, SA Wright submitted a cd-rom with images of possible child pornography to the National Center for Missing and Exploited Children (NCMEC) for examination through the Child Recognition Identification System (CRIS).

## DETAILS OF INVESTIGATION:

On November 21, 2008, SA Wright prepared and submitted a cd-rom containing still images of screenshots taken by the Snapshot screen capture software tool that appeared to be installed by the information technology department of INTHINC. The images recorded, totaling two hundred and thirty-two (232) were of MULLINS accessing the ORKUT social networking website using the name jacobjones1776@gmail.com. The images being submitted are in compressed format, per the requirements of the NCMEC. The request for this analysis and verification is being made for potential prosecution of MULLINS in United States District Court.

The investigating agent is SSA Brian Dean. SSA Dean currently works at the following location:

2487 South 1620 West, Suite 5  
Ogden, UT 84401  
Telephone: (435) 634-1354  
Email: brian.dean@dhs.gov

The submitting agent is SA James Wright. SA Wright currently works at the following location:

46 West 300 South, Suite 206  
Salt Lake City, UT 84101  
Telephone: (801) 524-5884 x224  
Email: james.p.wright@dhs.gov

Upon completion of this identification process, please contact SSA Dean with the results of the analysis.

This investigation is continuing.

	CASE NUMBER OU05PR08OU0001
	REPORT NUMBER: 001

I left the business and returned to the Ogden, Utah RAC ICE Office. At approximately 11 AM, Ms. Keller called and said they terminated Mr. Mullins. Keller stated their IT department accessed the computer Mr. Mullins used and discovered that he had come into the business last night, June 10, 2008, and used the computer to access pornographic sites from approximately 9 PM to 1 AM. Ms. Keller said the IT TECH located images of human genitalia and that these sites were accessed during the night on June 10, 2008. Keller requested that I return to the business. At approximately 11:30 AM Ms. Keller called back and said they had found over 3,000 images of children with full nudity. Keller stated these images were on the computer used by Mr. Mullins. I responded back to the business at 2 PM in Logan, Utah, and talked with Keller and Mr. Tom Sunderland, the IT Tech at INTHINK. I personally viewed one of the images on the computer that showed a young male approximately 12 years old who was fully nude. This photo showed his penis and this child was shown in different poses. I informed Ms. Keller that I wanted to seize the computer CPU in order to access the images as I would need the images for evidence. Keller agreed to release the CPU to me and I completed an evidence log form, CBP Form 6051S, signed the form, and had Keller sign the form as well. The CPU was taken back to the ICE Ogden, Utah RAC Office and placed into evidence at approximately 3:30 PM on June 11, 2008. I placed a call to our Forensic Computer Examiner, Senior Special Agent James Wright of the Salt Lake City ICE Office to advise him that I had a computer and needed to have it processed for evidence. Agent Wright stated he would process the CPU as soon as possible.

I called AUSA Karin Fojtik to discuss this case for prosecution.

On Friday June 13, 2008, AUSA Karin Fojtik prepared and requested two (2) search warrants, one for the Inthink HP CPU and one for the Flash drive (data storage device) left at Inthink Mullins. These search warrants were signed by US Magistrate Nuffer at approximately 12 PM under US District Court case number 2:08MJ 189 DN. These search warrants authorize the search of the CPU and Flash Drive for evidence of child pornography. This search will be conducted with the assistance of Senior Special Agent James Wright, computer forensics examiner from the Salt Lake City, Utah ICE Office on Monday June 16, 2008. Results of these searches will be forwarded to the AUSA for further action.

Follow-up Investigation Pending

## DETAILS OF INVESTIGATION:

On June 16, 2008, SA James Wright of the ASAC, Salt Lake City, UT Office received a request from SSA Robert Stokes to initiate a computer forensic imaging, analysis and examination of one (1) seized computer and one (1) usb thumb drive. These items were seized subsequent to the execution of a federal search warrant based on information received from INTHINC Corporation where MULLINS was employed.

On October 26, 2008, prior to forensic imaging, SA Wright initiated a preliminary forensic preview on June 16, 2008. SA Wright then initiated a preliminary forensic hash baseline of the suspect hard drive. The baseline hash value, which is a Message Digest 5 (MD5) value, is a cryptographic hash function with a 128-bit hash value and used to check the integrity of files and their contents. SA Wright utilized a validated Tableau IDE/Firewire IEEE 1394/USB 2.0 hardware write blocker and ENCASE version 4.2 boot floppy disk to prevent any change to the suspect hard drive. Using this method, SA Wright is able to obtain a hash value of the hard drive. A hash value was generated, 4d27eb4850d5bbaac83c73e1b288ab10. Following the creation of the baseline hash

DEPARTMENT OF HOMELAND SECURITY ICE	PAGE 3
REPORT OF INVESTIGATION CONTINUATION	CASE NUMBER 0005PR08OU0001
	REPORT NUMBER: 003

value, SA Wright initiated an additional computer forensic imaging of the suspect hard drive. SA Wright using Forensic Toolkit Imager version 2.5.4.16, created a compressed forensic image of the suspect hard drive. The image, labeled MULLINS1.E01, is a mirror image of the hard drive. Another hash value was generated, computed and matched to the baseline, 4d27eb4850d5bbaac83c73e1b288ab10. A final hash value was generated using the initial method to determine the hash value. 4d27eb4850d5bbaac83c73e1b288ab10 was generated as the post hash baseline. Based on the accompanying hash values, there appeared to be no change to the original suspect hard drive.

SA Wright also initiated a preliminary forensic hash baseline of the suspect usb thumb drive. The baseline hash value acquired using a validated Tableau USB hardware write blocker and ENCASE version 4.2 boot floppy disk to prevent any change the usb thumb drive. The hash value generated and computed was 98b8f8e631b6650b4f26f110f99694ee. SA Wright using Forensic Toolkit Imager Version 2.5.4.16, created a compressed forensic image of the suspect thumb drive. The image, labeled MULLINS2.E01, is a mirror image of the hard drive. While imaging the suspect thumb drive, using validated write blocking hardware device, an hash value was generated. The value, 98b8f8e631b6650b4f26f110f99694ee, verified and appears to match the initial value generated, indicating that there appeared to be no change to the original suspect hard drive.

Upon completion of the imaging process for both evidence items, SA Wright initiated forensic processing and analysis of the suspect mirror images utilizing AccessData Forensic Toolkit version 1.72. SA Wright accessed the Complementary Metal Oxide Semiconductor (CMOS) date and time on the HEWLETT PACKARD/COMPAQ computer. SA Wright powered on the suspect desktop, with the hard drive removed and using the F10 key (HP) as the designated boot key, accessed the date and time information found in the CMOS.0 The date and time displayed was Wednesday, October 29, 2008, at about 11:40 hours (MST). This is consistent with the actual date and time.

SA Wright, upon completion of the forensic processing software, began analysis on the process image. Examination of the computer and thumb drive images was to include searching for multimedia files of the following formats: Joint Photographic Expert Group (JPEG), Moving Picture Experts Group (MPEG), Portable Network Graphics (PNG), Graphics Interchange Format (GIF), Audio Video Interleave (AVI), Real Media (RM), and Quicktime (Apple). These types of multimedia files are those that are commonly associated with still and streaming video files.

The examination of the computer and the thumb drive yielded the information that SA Wright discovered that the company employing MULLINS, utilized a monitoring program called SNAPSHOT to record MULLINS Internet activities and

REPORT OF INVESTIGATION CONTINUATION	CASE NUMBER 0005PR08OU0001
	REPORT NUMBER: 003

website access. MULLINS accessed a website called Orkut.com. This is a free-access social networking service owned and operated by Google. The service is designed to help users meet new friends and maintain existing relationships. MULLINS, using his Orkut account access, visited other profiles containing images of what appear to be prepubescent males nude with their genitalia exposed. MULLINS username is identified as jacobjones1776@gmail.com. MULLINS accessed areas of ORKUT that appeared to contain both English and Portuguese language. Orkut is identified as one of the biggest social networking websites in Brazil, where Portuguese is the predominant language. All of these images were found in MULLINS1\Part 1\NONAME-NTFS\Documents and Settings\Administrators\Desktop\Bob Mullins\Bob\_Mullins. The total number of these images was two hundred and thirty-four (234). Of those images, fourteen (14) were identified as deleted. Additionally, twenty-four (24) images of what appears to be child erotica were discovered. Of these images, a total of sixteen (16) were identified as deleted.

These images, along with MULLINS Internet activities, were bookmarked and will be placed on a computer forensic examination findings compact disc for the case agent.

The images of suspected child pornography were submitted to the National Center for Missing and Exploited Children (NCMEC) for analysis and verification. The following images were identified as matches:

/BobMullins2305[372914].jpg (2nd row from top, 1st image from right)  
 /BobMullins2306[372916].jpg (2nd row from top, 1st image from right)  
 /BobMullins2307[372918].jpg (2nd row from top, 1st image from right)  
 /BobMullins2308[372920].jpg (2nd row from top, 1st image from right)

These images identified by NCMEC were part of the GERBER STEIN series of known child pornography images. A copy of the NCMEC report was forwarded to the case agent.

This report is a complete synopsis of the computer forensic findings to date, conducted on the items referenced in this report and based solely upon the searches identified. This report may not be inclusive of all potential evidence contained on the computer and digital storage media referenced in this report. Any additional forensic analysis conducted on the listed computer media will be documented in future reports.

This investigation is continuing.

Mullins - 1010

To whom it may concern,

My name is Scott Venhaus, my title is director of manufacturing. I was hired in October 2006.

On Monday, June 9, 2008 I was approached by Tom Sunderland and informed that individuals in the Box Build area were witnessed using the internet for reasons other than in the performance of assigned duties.

I asked Tom if we had the monitoring software we had used in the past to which he said we did.

We then went to box build where I stated in front of the holistic testers and Tom that I wanted monitoring software installed on all computers.

After having discussions with BJ Larsen, RMA Coordinator, who had stated that he had witnessed Bob Mullins working on his personal business while at work, I asked Tom to install the monitoring software on Bob's computer.

On Tuesday, June 10, I was approached by Karsten Sorensen and Tom Sunderland who informed me that they checked the monitoring software and found they he was spending an inordinate amount of time working on his personal business and while monitoring where and what Bob was working on witnessed what Karsten and Tom considered child pornography. I immediately contacted Jessica Keller, Director of Human Resources and informed her of what had occurred.

On Wednesday, June 12, Bob Mullins employment with Inovar was terminated for cause; specifically, excessive use of internet for means other than in the performance of assigned duties.

Respectfully,

Scott Venhaus  
Director of Manufacturing  
Sent via BlackBerry from T-Mobile

( Mullins-1011 )

Karsten Sorensen  
RMA Manager  
Inovar, Inc.

On May 19, 2008 I was informed by BJ Larsen and Jenna Allison that Robert Mullins was spending 2-4 hours during the day doing personal work on his assigned work computer. I then warned Robert verbally about internet usage on May 21, 2008. Robert continued to abuse the right to use the internet by doing personal related business on the company assigned computer. On May 23, 2008 I asked the IT group (Tom Sunderland and Brennan Lindsey) to take internet privileges off Robert's assigned computer. On May 26, 2008 I verbally counseled Robert again and told him why the internet was taken off his assigned computer. He replied that he understood and that he would not do it again.

Robert was warned but continued to abuse using the internet for personal use. Robert also went around the preventive measures that the IT group put into place. This was evident when Tom Sunderland and I viewed the history of what had taken place on his computer June 10, 2008. Robert had used internet access through a different server.

When Tom and I viewed the history of what Robert accessed on June 10, 2008 we found he was composing personal emails, doing personal business, and viewing child nudity. The personal emails consisted of subjects dealing with a business Robert was putting together. The personal business was composing letters and pulling information for his business. The child nudity consisted of foreign web pages of boys with frontal nudity. After viewing the history Tom and I contacted my supervisor Scott Venhaus. Scott viewed the history and contacted the head of HR Jessica Keller. Jessica viewed the history and made further contact with people in the legal department. I started the termination paper work for the next day.

On June 11, 2008 Jessica Keller, Scott Venhaus, and I terminated Robert Mullins employment at Inovar, Inc. at 10:30am on grounds of using the internet for personal use 2-4 hours on June 10, 2008. Robert understood that we had given him fair warning and that he went against the counseling given on May 26, 2008. Robert signed the termination paperwork without any argument and left the building.

On June 11, 2008 Tom and I proceeded to collect the history from the previous day. We were surprised to find that Robert had come into the building and used the computer June 10, 2008 at around 9:30pm. We

viewed the history and found more child nudity, the nature of which was more explicit than the day before. Tom and I saw frontal nudity with close up pictures of penises.

( Mullins-1013 )

Tom Sunderland  
Systems Administrator  
Inovar

My name is Tom Sunderland, I am currently the Systems Administrator for the Inovar division of inthinc. I have been employed at Inovar since June 30, 2003. I have been in the IT industry since 1993.

On May 23, 2008, Karsten Sorenson asked me to install inet Protector to block internet access on Robert Mullins computer. I installed the software and set it up to only allow access to our online timecard and our home website.

I was informed by BJ Larsen that the internet activity was still taking place on June 9, 2008. I informed Scott Venhaus Director of Production that our internet blocking software had been circumvented somehow and he asked me to install SpectorSoft, a computer monitoring software to find out how he was accessing the internet.

On June 10, 2008 after Robert had left for the day, Karsten and I went to Robert's computer to view the day's activities. We found that he was access the internet through a remote connection to the server which he needed to run an RMA program. The server's internet connection wasn't disabled as this is our current web server. The time spent on personal/non work related activities was around 4 hours or so and at the end of the log for about 10 mins we encountered some child nudity. The pictures didn't seem to graphic, but you could tell they were younger boys in their underwear. We contacted Scott and informed him what we found and he contacted Jessica Keller our Director of Human Resources to witness what was found.

On June 11, 2008 after Robert was terminated Karsten and I went to his computer to save the captured history to a disk and found that Robert had come in and used his computer from about 10:00pm to 1:00am. We called Jessica and had her come and view the content from that period of time. During that time span, he extensively viewed more child nudity. This time span seemed more explicit than the first log. Many pictures of young boys with no clothes on, some pictures contained male genitals. We saved the individual screen captures to the desktop and removed the computer from the room. We waited for the ICE agent to come and we gave him the computer.

Mullins - 1014

June 11, 2008

My name is Jessica Keller. I am the Director of Human Resources for inthinc, inc. and Inovar, an inthinc company (formerly Inovar Inc.). I was hired February 22, 2007. I have over 7 years experience in Human Resources.

I was asked on Tuesday, June 10<sup>th</sup> at around 6 pm to come to the RMA office/area by Scott Venhaus, Director of Production. He didn't give any specifics over the phone. When I entered the RMA office I was greeted by Scott Venhaus (Director of Production), Tom Sunderland (IT Manager) and Karsten Sorenson (RMA Supervisor). Karsten told me that they had found some "child pornography" on a work computer that was being used by our employee, Robert Mullins aka Bob.

I asked them how this came about. Karsten explained that he had some concerns about Bob's performance recently and thought that he was spending too much time playing on the internet. He had asked Tom to limit internet sites on all of the computers in the area. They were limited to a worksite and the time clock link. Karsten also asked Tom to install "SpectorSoft" on his computer which would capture the screen throughout the day as it was being used.

Tom had installed this software on Monday, June 9<sup>th</sup>. When I arrived they were reviewing their findings and found the "child pornography." I told Tom to make a copy of what he had found. I didn't look at the photos. I asked the guys what they had seen. Karsten said that he saw little boys on the screen. He was clearly disgusted. Tom said that saw he saw the same thing.

Then I called Jeff Harvey, General Counsel for inthinc, inc. He told me that we would discuss details in the morning at 9 am. Then I got a call from Blake Kirby, President and COO of inthinc, inc. Blake wanted to know who the employee was and what we had found.

I went home. At around 7 pm I called my dad, John Harrison, who is a criminal investigator for the IRS, to get his advice on who I should call in the morning. He said that he "knew a guy" and would give me a contact person and a phone number in the morning.

At about 7:30 pm I received a phone call from Senior Special Agent Bob Stokes. I gave him all of the information that I had. I called him back several times after calling Tom for details and then relaying that info back to Agent Stokes. I agreed to meet Agent Stokes at 8 am on Wednesday, June 11<sup>th</sup> at Inovar located at 1073 West 1700 North.

Mullins - 1015

Tom and I met Agent Stokes this morning, June 11<sup>th</sup> at 8 am. We showed him the data that we had captured. There were photos of boys in their underwear, all of whom looked under the age of 16. Agent Stokes didn't think that was enough evidence so we thanked him for his time and informed him that we would be terminating Robert Mullins before noon for poor performance and general misuse of company internet and property.

At 10:30 am on June 11<sup>th</sup> Scott Venhaus, Karsten Sorenson and myself terminated Robert Mullins. We collected his badge to the building and his other keys. We told him that he was not to return to his desk to collect his personal effects but that we would mail it to him. He was very concerned about his personal flash drive. I insisted that we would mail it to him. He didn't say much. He gave us his smock and keys and calmly left the building. I had two Logan City policemen outside in the parking lot in case we needed their assistance.

At around 10:45 am Tom, Karsten and I returned to the RMA office / area. We discovered that Robert had come back during the night at around 9:45 pm and had used the computer. We looked at the screen and saw that he had returned to the same site as before. We viewed the photos to see if any of the children were nude or in sexual situations. We saw an up close shot of a penis on the left side of the screen. Then we continued and we saw photos of young boys, about 8 years to 12 years of age was my guess, fully nude and in posing positions. It was enough, I thought, to contact Agent Stokes and have him return.

I went to a conference room at the front lobby area and I called Agent Stokes. He said he would return at 2 pm. Then I called Jeff Harvey our legal counsel to inform him of what I had seen. He advised me to continue to work with the authorities and provide them with any information that they needed.

I returned to the RMA area. Tom was copying everything. He had turned off the monitor not wanting to watch the photos. I told him that I would watch the photos so that I could help Agent Stokes. I viewed at a fast pace while he was copying as the program played out. Images of young boys, fully nude, up close and in poses continued across the screen. These images were very graphic and detailed. I saw multiple photos of nude boys on the screen at one time. I could visibly see their penis, genitals and buttocks. I consider myself to be a reasonable person and I would say that this was child pornography. No doubt in my mind. This was not adult porn. These kids looked young. I have four close nephews under the age of 15 and my own son who will be 5 soon. I would say that the children in the photos looked older than my son (more than 5 years old) and less than my oldest nephew who is 15. My best guess would be that they were 8-12 years old.

Agent Stokes returned at 2 pm. After Tom explained how the software worked and how he had saved the images in a jpeg file which saved them every 15 seconds Agent Stokes briefly looked at one of the jpeg images and determined it was sufficient. We had over 3,000 images saved. Then we gave him the computer for evidence.

Mullins - 1016

years old who was fully nude. This photo showed his penis and this child was shown in different poses. SSA Stokes informed Ms. Keller that SSA Stokes wanted to seize the computer CPU in order to access the images as SSA Stokes would need the images for evidence. Keller agreed to release the CPU to me and SSA Stokes completed an evidence log form, CBP Form 6051S, signed the form, and had Keller sign the form as well. The CPU was taken back to the ICE Ogden, Utah RAC Office and placed into evidence at approximately 3:30 PM on June 11, 2008. SSA Stokes placed a call to our Forensic Computer Examiner, Senior Special Agent James Wright of the Salt Lake City ICE Office to advise him that SSA Stokes had a computer and needed to have it processed for evidence. Agent Wright stated he would process the CPU as soon as possible.

On Friday June 13, 2008, AUSA Karin Fojtik prepared and requested two (2) search warrants, one for the Inthink HP CPU and one for the Flash drive (data storage device) left at Inthink Mullins. These search warrants were signed by US Magistrate Nuffer at approximately 12 PM under US District Court case number 2:08MJ 189 DN. These search warrants authorize the search of the CPU and Flash Drive for evidence of child pornography. This search will be conducted with the assistance of Senior Special Agent James Wright, computer forensics examiner from the Salt Lake City, Utah ICE Office on Monday June 16, 2008.

On or about September 10, 2009, SSA Brian Dean and SSA Greg McClune went to the current residence of Robert MULLINS at 124 N. 450 W. Fielding, Utah, in an effort to perform a "knock and talk" with MULLINS. MULLINS would not allow us do a search of his computers. SSA's Dean and McClune left the residence without incident.

Mr. Robert Mullins  
#121148  
Sanpete County Jail  
1500 S Highway 89  
Manti, UT 84642

Dear Mr. Mullins:

You have contacted the Consumer Assistance Program at the Utah State Bar regarding your concerns about your legal matter and attorney, David M. Perry. It has been determined this matter requires communication between you and Mr. Perry. By copy of this letter to him, Mr. Perry is informed of your concerns and requested to respond to you about them.

Mr. Mullins, you stated the following:

In about 2016, Mr. Perry was assigned to represent you in post-conviction relief. It was your understanding Mr. Perry would file a document with the court to proceed in your post-conviction relief case. However, Mr. Perry never filed any document with the court.

Mr. Perry had informed you that he had obtained an exculpatory letter from Mr. Tom Sunderland, and several times you have requested that Mr. Perry send the letter to you. You last spoke with Mr. Perry three years ago, and at that time you again requested that he send you the letter. Mr. Perry responded that he no longer works on your case, but he has not filed a Withdrawal of Counsel. Consequently, according to the court file, he is still your attorney of record.

You again ask Mr. Perry to send to you Mr. Sunderland's exculpatory letter.

Mr. Mullins, please know if I do not hear from you within 30 days, then I will consider this matter to be concluded as far as my office is concerned. I will then permanently close this file and the contents will be destroyed. If you have any questions regarding this letter, please call me.

Sincerely,

Jeannine P. Timothy  
Consumer Assistance Program Attorney

cc: David M. Perry, Esq.
